**PI® Version 6.0.4**

- Available for download from <http://www.fotoinc.com/support.htm>
- Choose PTPN or Non-PTPN clinic

The screenshot shows a web browser window displaying the 'Support' page of the FOTO website. The page has a dark header with the 'FOTO' logo. Below the header, there is a navigation menu with options like 'Home', 'About', 'Contact', 'Support', 'FAQ', 'Privacy Policy', and 'Terms of Use'. The main content area is titled 'Support' and contains a section for 'New Version Available'. It states: 'Click one of the links below to download the most recent version of PI® 6.0.4. Non-PTPN Clinics - Click here to download version 6.0.4. PTPN Clinics - Click here to download version 6.0.4.' There are two buttons: 'Download Non-PTPN Version' and 'Download PTPN Version'.

---

---

---

---

---

---

**New Features**

- Expanded risk-adjustment
- FABQ Physical
- New CATs
- Improved data entry screens
- Additional Optional Surveys
- Seed Items
- Optional demographic questions

---

---

---

---

---

---

---

## Expanded Risk Adjustment

- All current remain
- Severity at Intake – more precise
- Gender
- Payment Source
- Co-morbidities
- Fear

---

---

---

---

---

---

---

---

## New Design for Patient Set Up

---

---

---

---

---

---

---

---

## FABQ Physical

- One question for all
- Remaining three, if needed
- Predictive; Valuable risk adjustment
- Alter treatment
  - Education
  - Hurt vs. Harm
  - Go through activity

---

---

---

---

---

---

---

---

**New CATs**

- Elbow / Wrist / Hand
  - DASH; UEFI
- Medical / Neurological
  - Re-analyzed general CAT
- FABQ Work

---

---

---

---

---

---

---

---

**Additional Optional Surveys**

- Hand & Upper Extremity Survey
- Cervical questionnaire
- PROMIS
- University of FL Hand and Upper Extremity
- ABC Scale
- PQRI Measure 4, Future Fall Risk

---

---

---

---

---

---

---

---

**PQRI**

- Physician Quality Report Initiative
- Additional reimbursement from CMS
- Electronic and Paper options to gather from the patient
  - Documents measure gathered
  - Provides CPTII code for billing
- Webinar training on that can be accessed at <http://www.fotoinc.com/webinar.shtm>

---

---

---

---

---

---

---

---

### Seed Items

- High Functioning Activity
  - Lifting 100 lbs
- Change as data gathered
- Improve sensitivity for high functioning patients

---

---

---

---

---

---

---

---

### Optional Demographic Questions

- Test for importance is risk adjustment
  - Military service
  - Race / ethnicity
  - Educational level
  - Household income
- May be turned off in PI Default Settings

---

---

---

---

---

---

---

---

### PI Default Settings – Patient Survey

---

---

---

---

---

---

---

---

## Improved Paper Data Entry

- Condition specific paper surveys
  - Lumbar
- Easier data entry screens
- French language option

---

---

---

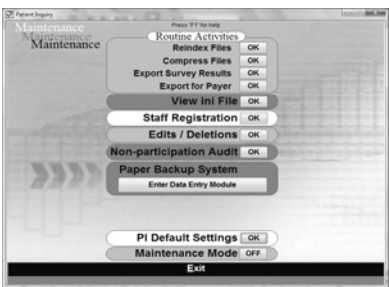

---

---

---

---

## Data Entry Module

---

---

---

---

---

---

---

## Select Type of Paper Survey

---

---

---

---

---

---

---

## New Patient Specific Report

From The Therapeutic Outcomes, Inc. 00-000-000 0

<b>Functional Status Intake Summary</b>		04/19/07
Patient ID #: TEST (1)	Risk Adjustment/Category (1)	
Patient: PATIENT, SAMPLE	Gender: 100	
Date of Birth: 10/10/1950	Age: 57	
Previous Episodes: Yes	Case Type: Orthopedic	
Primary Body Part: Lumbar Spine	Impairment: Lumbar Spine, Sacrum	
Measurement: Spine Pathology	Duration: Over 6 months	
Initial Date of Service: 03/19/2007	Place Source: Performed Procedure	
	Co-morbidity: Dep	
	Fear: Elevated	
	Severity: Very Severe	

Functional Status Measure (1)	Painor	EQDQ*
Physical FS Measure Primary	40 (0)	24 (0)

**Rehabilitation Resource Predictor**  
 FOTO Patients with similar risk adjusted parameters (Case type, Body Part/Impairment, Severity, Age, Acuity, Gender, Surgery, Fee, Place Source, and Co-morbidity) have utilized rehabilitation measures and expenditure for following month.

<b>FOTO Mean Data</b>	Primary Body Part (1)
Change Score	19
Physical FS Change	
Measures:	
Visits per episode	8
Duration of episode	34
Expend per episode	\$1088
Sub-factors:	86.0 %

(\*Painor reported for a Veterans and is not in the Annual Form)
